PROJECTS

HackConcordia Cybersecurity Hackathon | Cybersecurity, Teamwork, Logic Solving　　*HackConcordia 2025*

- Participated in a beginner-friendly cybersecurity hackathon focused on solving small-scale real-world security challenges.
- Tackled logic flaws, basic decoding tasks, and simple exploit simulations using collaborative teamwork.
- Gained first exposure to cybersecurity fundamentals, including ethical hacking, problem-solving, and digital defense techniques.

LAUNCH IT Website | PHP, React, JavaScript, MySQL, HTML5/CSS, XAMPP　　*Personal Project 2024*

- Developed a full-stack e-commerce platform with login/signup authentication, cart functionality, and database integration.
- Created admin and user dashboards enabling product management, price updates, and real-time order tracking.
- Structured a normalized MySQL database to store users, products, and transaction data with persistent access.
- Deployed locally using XAMPP with scalable, extensible architecture for future feature expansion.

Interactive Calculator Web App | JavaScript, HTML, CSS　　*Personal Project 2024*

- Designed and developed a responsive calculator web application with real-time input handling and arithmetic processing.
- Implemented user input validation, display formatting, and clean UI design for an intuitive experience.
